Subject: "microsoft anti-trust suit"

To Whom It May Concern: I'm strongly against the settlement of microsoft. Microsoft was found guilty of monopoly dealings and should be punished accordingly. Not slapped on the hand and told to be good. If Microsoft gets away with this, they will be demise of this great country & economy. If you destroy the entrepreneu in technology (the true backbone of this country), which Microsoft has done and is doing, you will destroy what this country stands for; liberty, justice and the American dream to have your own business. Microsoft should reveal their source code and stop crushing their competition. Sincerely yours, Edwin J. Lussier, 3085 Applewood Drive, Marietta, Ga. 30064
